NOTIFICATION OF TRANSMITTAL OF THE INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

(PCT Rule 71.1)

Date of mailing

(day/month/year)

19.11.2004

Applicant's or agent's file reference 1680D/MG

IMPORTANT NOTIFICATION

International application No.

International filing date (day/month/year)

30.10.2003

Priority date (day/month/year) 30.10.2002

PCT/IT 03/00703

Applicant

OLIVETTI TECNOST S.P.A. et al.

- The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the
 international preliminary report on patentability and its annexes, if any, established on the international
 application.
- A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
- 3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

4. REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary report on patentability. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

The applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purposes of international preliminary examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State, the claimed inventions is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, clarity and support for the claims.

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/IT 03/00703

I. Basis of the	repor	t
-----------------	-------	---

1. With regard to the **elements** of the international application (Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)):

	Des	scription, Pages	
	1-2	4	as originally filed
	Cla	ims, Numbers	
	1-1	7	as amended (together with any statement) under Art. 19 PCT
	Dra	wings, Sheets	
	1/3-	-3/3	as originally filed
2.	Wit lanç	h regard to the langu guage in which the int	age, all the elements marked above were available or furnished to this Authority in the ternational application was filed, unless otherwise indicated under this item.
	The	ese elements were av	railable or furnished to this Authority in the following language: , which is:
		the language of a tra	anslation furnished for the purposes of the international search (under Rule 23.1(b)).
٠.		the language of pub	lication of the international application (under Rule 48.3(b)).
		the language of a tra Rule 55.2 and/or 55.	anslation furnished for the purposes of international preliminary examination (under 3).
3.	Witl inte	h regard to any nucle rnational preliminary	eotide and/or amino acid sequence disclosed in the international application, the examination was carried out on the basis of the sequence listing:
		contained in the inte	rnational application in written form.
		filed together with th	e international application in computer readable form.
		furnished subsequer	ntly to this Authority in written form.
		furnished subsequer	ntly to this Authority in computer readable form.
		The statement that t in the international a	he subsequently furnished written sequence listing does not go beyond the disclosure application as filed has been furnished.
		The statement that t listing has been furn	he information recorded in computer readable form is identical to the written sequence ished.
4.	The	amendments have r	esulted in the cancellation of:
		the description,	pages:
		the claims,	Nos.:
		the drawings,	sheets:

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement.

- 1. Reference is made to the following documents:
- D1: EP-A-0 856 821 (NIPPON TELEGRAPH & TELEPHONE) 5 August 1998
- D2: EP-A-0 936 584 (MATSUSHITA ELECTRIC IND CO LTD) 18 August 1999
- D3: US 2001/000814 A1 (GUTHERY SCOTT B ET AL) 3 May 2001
- 2. Amendments (Article 41(2) PCT).

Support for the claims 1-17 filed with the letter dated October 14. 2004 has been found in the description in the following parts:

- -page 6, lines 14-19;
- -page 14, lines 19-25;
- -page 15, lines 9-10;
- -pages 19-21.

Therefore, the requirements of Article 41(2) PCT appear to be fulfilled.

- 3. Independent claims 1, 12, 13, 14, 15, 17.
- 3.1. Claim 1.

The document D1, which is regarded as being the closest prior art to the subject-matter of claim 1, discloses a distributed system comprising:

- -a central control unit (management center 4);
- -a plurality of local terminals (IC card term 2a, 2b) distributed throughout the land, said central unit being suitable for controlling said local terminals through a communication and control network;
- -a plurality of smart cards (IC card 6) assigned to the operators of said local terminals, said smart cards being provided for being used by said operators to activate and enable said local terminals to issue printed objects;

[column 4, lines 25-57; figures 1-3]

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

(

PCT/IT 03/00703

-an initialisation programme associated with said central unit, with said local terminals and with said smart cards

[column 18, line 49 - column 19, line 44; figures 11-12]

The subject-matter of claim 1 differs from this known system in that the initialisation programme is able to initialise in combination, a given local terminal and a given smart card, so as to establish between said given terminal and said given smart card a biunequivocal relationship of correspondence and cooperation, such that, said given smart card is enabled, within the framework of said system, to cooperate solely with said corresponding given terminal and in turn said given local terminal is enabled for issuing said printed objects solely after having recognized said given smart card in combination with which it was initialised.

The problem to be solved by the present invention may be regarded as generally providing a higher level of security in the use of defined local terminal for accessing to a service (namely issuing printed objects) by an owner of a card registered and authorised for this very local terminal.

Such a problem is not at all addressed in the system of document D1 because it is working exactly in the opposite option whereas each IC card can be used on various terminal (see column 21, lines 29-51). The other relevant prior-art documents (D2 and D3) presently available also disclose systems in which any terminal can be accessed by different IC cards.

Therefore, the solution proposed in claim 1 of the present application is considered as involving an inventive step (Article 33(3) PCT).

- 3.2. Independent claims 12, 13, 14, 15, 17 define a method corresponding to the system of claim 1 and systems related to the system of claim 1. The subject-matter of these claims being based in the same solution is therefore considered as involving an inventive step (Article 33(3) PCT).
- 4. Claims 2-11 and 16 are respectively dependent on claim 1 and claim 15. As such these claims also meet the requirements of the PCT with respect to novelty and inventive step.
